WASTE COLLECTION SERVICE

DOOR-TO-DOOR

1

Separate your waste correctly at home.

2

The collection company will collect/ empty the waste and leave the bin empty again.

3

Once the collection has been completed, you must take the bin back inside your home.

4

Check the calendar to find out what type of waste you can put out on each day of the week.

5

Place the waste inside the multi-fraction bin and put the bin in front of your home's door. This helps avoid inconveniencing pedestrians.

6

In case of an emergency, you can take the waste to the municipal Recycling Centre.

WHAT DO YOU NEED TO USE THE
DOOR-TO-DOOR COLLECTION SERVICE

1. A **ventilated bin** to keep inside the kitchen and use for organic waste (food scraps and small amounts of garden waste). When it is time to put the organic waste out for collection, place the closed bag inside the multi-fraction bin.

2. A **multi-fraction bin** to put all waste out in the street according to the waste collection calendar.

3. A **magnet showing the waste collection calendar**, where you will find information about which types of waste you can put out each day and the time at which you should leave the multi-fraction bin outside your home.
